

### Brake Cleaner 500ml

A Hydrocarbon based volatile degreaser and Brake and Parts Cleaner.

#### Application :

To remove greasy or resinous residues during servicing, repair and prior to assembling.  
Ideal for residue-free cleaning,

**AFBC500ML**

### Rust Penetrating Spray 400ml

Rust Remover on a mineral oil basis with excellent creep properties, long-life corrosion protection and very good friction value reduction thanks to MoS<sub>2</sub> solid lubricants,

Silicone Free

**AFRPS400ML**

### Adhesive Grease Spray 400ml

Partially synthetic long-life adhesive grease with wear protection additives. Lubricates parts working under extreme pressure and shock loads and vibrations. Quick evaporation of solvent, therefore immediately strong adhesion to metal.

**AFAG400ML**

### Silicone Spray 500ml

High quality silicone spray with good sliding, separating and lubricating properties. Very good material compatibility and high temperature resistance.

Temperature resistant from -50 to 250° C

**AFSIL500ML**

### Carburettor Cleaner Spray 500ml

Special highly active system cleaning agent for removing contamination and deposits in throttle valves and intake/exhaust systems.

Outstanding solvent characteristics where oil, rubber, resin, grease and paint are present.

**AFCC500ML**

### Zinc Spray 400ml

Matt grey metal protective paint on the basis of zinc metal powder of high purity.

Premium corrosion protection. Perfectly enhances the appearance of metal surfaces.

Zinc content 99%

**AFZIN400ML**
